Dr. Bruce Perry, M.D., Ph.D.

Introduction to the Neurosequential Model: Applications for Mental Health and Education

The development of a young child is profoundly influenced by experience. Experiences shape the organization of the brain, which, in turn, influences the emotional, social, cognitive and physiological activities. Insights into this process come from understanding brain development. This session will provide an overview of key principles of neurodevelopment crucial for understanding the role of experience in defining functional and physical organization of the brain. This information will inform further discussion of the clinical and educational implications related to a neurodevelopmental approach to child maltreatment and suggest new directions for clinical and educational approaches.

April 17, 2020

8:00 a.m. Coffee & Registration

8:30 a.m. – 4:30 p.m.

(Lunch not included)

Victoria Inn Winnipeg
1808 Wellington Avenue
Winnipeg MB R3H 0G3

Session Fee: \$150

To register please visit: <https://www.7oaks.org/Pages/DrPerry.aspx>

Bruce D. Perry, M.D., Ph.D. is the Senior Fellow of The ChildTrauma Academy, a Community of Practice based in Houston, TX, and Professor (Adjunct) in the Departments of Psychiatry and Behavioral Sciences at the Feinberg School of Medicine at Northwestern University in Chicago and the School of Allied Health, College of Science, Health and Engineering, La Trobe University, Melbourne, Victoria, Australia. Dr. Perry is the author of over 500 journal articles, book chapters and scientific proceedings. His clinical research over the last ten years has been focused on integrating emerging principles of developmental neuroscience into clinical practice. This work has resulted in the development of innovative clinical practices and programs working with maltreated and traumatized children, most prominently the Neurosequential Model®, a developmentally sensitive, neurobiology-informed approach to clinical work (NMT), education (NME) and caregiving (NMC).
