

STUDENT INVOLVEMENT IN DECISION MAKING

A primary task of the school is to create a stimulating learning climate which develops active involvement of students in their education and develops a spirit of inquiry. This climate is created when students work together with school staffs in such activities as planning and evaluating school programs.

The Board believes that students should be encouraged by its professional staff:

1. to participate in establishing course goals, in planning classroom activities, and in improving courses of studies;
2. to express, in a responsible manner their own opinions, recognizing that every privilege and right has a corresponding responsibility;
3. to be involved in the planning of assembly programs and school-sponsored forums of interest;
4. to participate in student government organizations that provide students with a voice in school affairs; and
5. to participate in a variety of extra curricular activities to broaden their educational experiences.
