Crystal Hanson

Student Electronic Device Guidelines

At Ecole Leila North we value the education use of electronics devices. We recognize the value that these devices contribute to students, families and our school; however unauthorized use of these devices will not be tolerated. Please see the following policy to help us continue to be proactive in our growing technological era.

As students arrive to school at Ecole Leila North it is our intention of providing an environment that is engaging in all aspects of a student life including technology. However, between the hours of 9:00am and 3:30pm we will follow these guidelines:

- All electronics are the responsibility of the student and not the responsibility of the school, therefore if students bring them to the school they need to be in a secure area such as their locker.
- All electronic devices must be kept out of sight and turned off while in school (halls, classrooms, gym etc.) during school programs/presentations **except when used with the prior permission of the teacher/school**
- Students are free to use their devices before school, at break, during lunch and after school
- There are to be no devices to be taken into the Phys. Ed. change rooms and washrooms
- No photos or information of students or staff should be uploaded to any social networking site or distributed electronically without the knowledge and permission of these individuals.
- All school staff who deem inappropriate use of electronic devices may confiscate them from students and turn them in to an administrator. These devices will be returned to the student at the end of the day after they meet with administration. Repeat offenders will be told to keep their devices at home. If parents deem it is important for those students to have a device at school it will be kept in the office during school hours.
