

You have questions, we have answers.

Please visit www.7oaks.org/ALSF to view an FAQ on the project.

The Seven Oaks School Division Agricultural Learning and Service Facility is a cutting-edge, multi-use space that will educate students on the importance of environmental stewardship, agricultural production and nutrition while also meeting other divisional needs.

Seven Oaks School Division Agricultural Learning & Service Facility

Meeting your needs, addressing your concerns

Moving Your Division into the Future

At Seven Oaks School Division, we constantly adapt to meet the needs of our students and community and stay current with educational trends.

Today, we are in a position to develop a groundbreaking learning and service facility for our students and staff ... and - thanks to the proceeds from the sale of our current transportation service centre - we are able to do it without increasing our budget or your taxes.

SEVEN OAKS
SCHOOL DIVISION
community begins here

Nearly 90% of the site is dedicated to greenspace and outdoor education.

Other facilities at the site include:

- Indoor learning space
- Conference facility
- Administrative spaces
- Bus maintenance and parking

The facility is designed for its context within West St. Paul and architecture features unique elements to complement the surrounding area:

- Design and landscaping that respects surrounding residences
- Substantial aesthetic and buffering consideration
- Open space and fields situated adjacent to existing residences
- Strategic plantings and berms to provide visual buffering and sound attenuation
- High aesthetic standards conceived with nature in mind
